

## Conformity statement Peak

Date:

Identification:

Type reference:

Body number:

### Sticker reference delivered by Cemafruid:

According to this document, I undersigned ....., company representative....., declare that the vehicle/component \* referenced below has been produced with components in compliance with the certified types described below. These components have a conformity type certificate delivered by Cemafruid in compliance with tests protocol and procedure PIEK. So, the mark logotype has been put under my responsibility, on the vehicle/component\* referenced below in compliance with French use rules. This conformity statement confirms the vehicle/component\* complies with the maximum sound level of 60 dB (A) for deliveries between 11 pm and 7 am and 65 dB (A) for deliveries between 7 pm and 11 pm, according to the information in the table below:

| Vehicle/component | Exempt                   | Suppliers | Conformity type certificate number | Maximum sound level complied |
|-------------------|--------------------------|-----------|------------------------------------|------------------------------|
| Body              | <input type="checkbox"/> |           |                                    | ≤62 dB(A)                    |
| Refrigerated Unit | <input type="checkbox"/> |           |                                    | ≤62 dB(A)                    |
| Floor             | <input type="checkbox"/> |           |                                    | ≤62 dB(A)                    |
| Partition         | <input type="checkbox"/> |           |                                    | ≤62 dB(A)                    |
| Baseboard         | <input type="checkbox"/> |           |                                    | ≤62 dB(A)                    |
| Straps            | <input type="checkbox"/> |           |                                    | ≤62 dB(A)                    |
| Tailboard         | <input type="checkbox"/> |           |                                    | ≤62 dB(A)                    |
| Left door         | <input type="checkbox"/> |           |                                    | ≤62 dB(A)                    |
| Right door        | <input type="checkbox"/> |           |                                    | ≤62 dB(A)                    |
| Back door         | <input type="checkbox"/> |           |                                    |                              |
|                   | <input type="checkbox"/> |           |                                    |                              |
|                   | <input type="checkbox"/> |           |                                    |                              |
